Low Dock - You'll love the Mini-Ramp!

The perfect solution to the low dock (23 -36" above ground level) . Can be moved anywhere. Rugged construction provides many years of life. No more handling board and ramp combinations. Much safer than board and ramp combinations because the Mini-Ramp can not come apart. Provides a much more gentle slope than shorter one piece units. Hand Operated Hydraulic Pump raises front of ramp over trailer. Ramp can easily be positioned, then lowered. Safety Chains can then be attached to trailer and ramp is ready for use. What could be simpler?
