

Options for Steel Railroad Dockboards

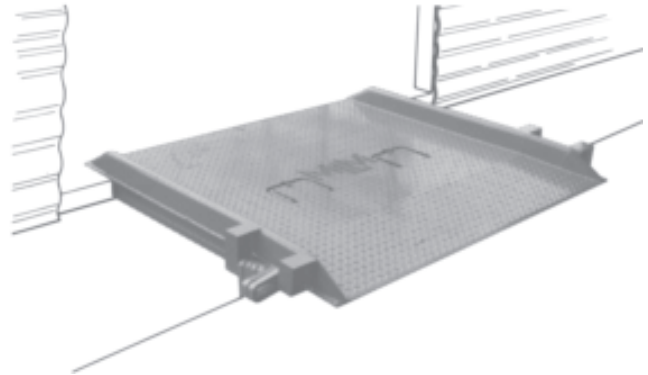

Lifting Loops

Enable forklift trucks to easily move and position large railroad dockboards. Loops swing up to make handling large boards a snap. Loops fold flush with plate when not in use, they're never in the way. On boards that have a span between 4 1/2 to 9 1/2" a drop style loop can be provided. Boards with a span less than 4 1/2" must use lifting chains. Loops are 4" high and have a 7 1/2" wide opening and are on 26" centers. (Wt. 31 lbs. extra) Add \$ 270.00 to list price (omitting chains)

Extra Large Lifting Loops

Only necessary for extremely high capacity boards when the lift truck forks that are handling the board are wider than 7". Loops have a 12" opening. (Weight 54 lbs. extra) Add \$400.00 to list price (omitting chains)

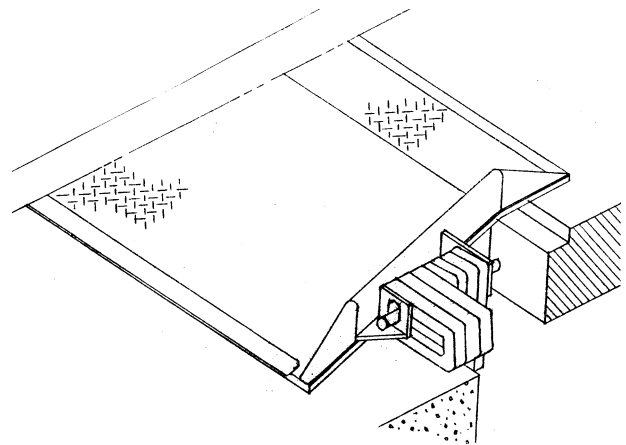

Automatic Locking Rings

Rings automatically fall into place without the need of driver intervention. Makes sure of solid locking. Rings are 1" wide x 11" deep (this means they stick down 8" below deck surface) and provide 8" adjustment. Rings add an additional 9" to the width of the board at the dock side. Weight 121 lbs.

Add \$550.00 to list price for rectangular boards
Add \$700.00 to list price for flared boards

For each additional ring (gives another 1" of adjustment on each side), add .. \$ 54.00 to list price

Optional Items for Steel Railroad Dockboards

Lifting Chains on Steel Boards	Standard	Lifting Loops (have 7-1/2" opening)	\$270.00
Four Hole Side Locks	Standard	Special Large Loops (have 9" opening)	\$400.00
<i>Gives 8" adjustment (Pins 1" dia. 9" long)</i>		Additional Bend	\$140.00
For Each Additional 2" of adjustment Add	\$16.00	Painting Side Rails Yellow	\$45.00
Automatic Locking Rings ... (wt. 100 lbs.)	\$550.00	Stenciling Capacity on Curbs	\$25.00
Automatic Locking Rings on Flared Boards ..	\$700.00	Welding Initials on Board (Per letter)	\$9.00
For Each Additional Ring (1" wide) Add	\$54.00	Abrasive Surface for Boards	Call
